

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede (Faculty of Social Sciences)

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Jana Arbeiter, jana.arbeiter@fdv.uni-lj.si

3. Raziskovalno področje (Research field):

5.06.00 Družboslovje, Politične vede (diplomacija); 5.06.00 Social Sciences, Political Sciences (Diplomacy)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Slov.:

Mladi raziskovalec oz. mlada raziskovalka se bo zaposlil/-a na Fakulteti za družbene vede, Univerze v Ljubljani, kjer bo raziskoval/-a ekonomsko in gospodarsko diplomacijo med Evropsko unijo (EU) in Ljudsko republiko Kitajsko, s posebnim poudarkom na vplivu kitajskih investicij na regijo Srednje in Vzhodne Evrope (CEE) ter Slovenijo. Hkrati se bo vpisal/-a na interdisciplinarni doktorski študij na Fakulteti za družbene vede, kjer bo v okviru raziskovalnega dela preučeval/-a spremembe v diplomatskih strategijah Kitajske in EU ter njihove posledice za diplomatske odnose med regijama, trgovinske in investicijske tokove ter izvajanje javne, ekonomske, razvojne in kulturne diplomacije Ljudske republike Kitajske v odnosu do EU in obratno.

Diplomske študije na Fakulteti za družbene vede imajo bogato tradicijo raziskovanja diplomacije, pri čemer se področje ekonomske in gospodarske diplomacije vse bolj uveljavlja kot ključen dejavnik mednarodne politične in ekonomske dinamike. Zato bo usposabljanje mlade/-ga raziskovalke/-ca osredotočeno na metodološko utemeljeno raziskovanje sodobnih diplomatskih procesov in empirično analizo v diplomatskih študijah, področje, ki je bilo do sedaj v veliki meri znanstveno in strokovno prezrto.

Usposabljanje in delo bo zajemalo razvoj naprednih metodoloških znanj, tako kvalitativnih kot kvantitativnih metod, v vsebinskem smislu pa tudi poglobljanje ekspertize na področju ekonomske in gospodarske diplomacije ter razvojne diplomacije Kitajske in EU.

Prvi, študijski del raziskovalnega dela bo usmerjen v pridobivanje in poglobljanje ključnih metodoloških orodij v diplomatskih študijah, pri čemer bo poudarek na analizi mednarodnih ekonomskih odnosov ter razvojnih politik. Raziskovalec/-ka bo razvil/-a epistemološke in metodološke temelje za preučevanje ekonomske in gospodarske diplomacije kot interdisciplinarnega področja, ki združuje diplomacijo, mednarodne odnose in trgovinsko politiko (v najširšem pomenu).

Osrednji del programa usposabljanja se bo začel z izbiro raziskovalne teme in natančnejšim oblikovanjem predloga doktorske raziskave, ki bo empirično utemeljena in osredotočena na vpliv diplomatskih in ekonomskih politik Kitajske na države CEE in Slovenijo. Sledila bo celovita izvedba raziskave in izdelava doktorske disertacije, ki bo temeljila na kombinaciji analize diplomatskih in diplomatsko-ekonomskih prioritet in strategij ter študij primerov.

Usposabljanje bo skozi celotno trajanje vključevalo tudi izvajanje raziskovalnega dela v okviru raziskovalne skupine, sodelovanje pri mednarodnih in nacionalnih raziskovalnih projektih ter objavljanje znanstvenih prispevkov v uglednih revijah s področja diplomacije in mednarodnih ekonomskih odnosov.

Obvezni pogoji:

- Predhodna družboslovna ali humanistična izobrazba (mednarodni odnosi, evropske študije, diplomacija, ekonomija, politične vede).
- Aktivno znanje slovenskega in angleškega jezika (pisno in govorno).

Zaželeni pogoji:

- Predhodne izkušnje z raziskovalnim delom, pridobljene v okviru konkretnih projektov ali mednarodnih raziskav.
- Poznavanje mednarodnih ekonomskih podatkovnih baz (Eurostat, UNCTAD, OECD itd.)

Eng.:

The young researcher will work at the Faculty of Social Sciences, University of Ljubljana, where he/she will research economic and commercial diplomacy between the European Union (EU) and the People's Republic of China, with a special focus on the impact of Chinese investment on the Central and Eastern Europe (CEE) region and Slovenia. At the same time, he will be enrolled in an interdisciplinary PhD programme at the Faculty of Social Sciences, where his research will examine changes in the diplomatic strategies of China and the EU and their implications for diplomatic relations between the two regions, trade and investment flows, and the conduct of the People's Republic of China's (PRC) public, economic, development and cultural diplomacy vis-à-vis the EU and vice versa.

Diplomatic studies at the Faculty of Social Sciences have a rich tradition of diplomatic research, with the field of economic and commercial diplomacy increasingly emerging as a key factor in international political and economic dynamics. Therefore, the training of the young researcher will focus on methodologically grounded research on contemporary diplomatic processes and empirical analysis in diplomatic studies, an area that has been largely ignored by scholarship and practitioners.

The training and work will include the development of advanced methodological skills in both qualitative and quantitative methods, as well as deepening substantive expertise in the field of economic and commercial diplomacy and development diplomacy of China and the EU.

The first, academic part of the research will focus on the acquisition and deepening of key methodological tools in diplomatic studies, with an emphasis on the analysis of international economic relations and development policies. The researcher will develop the epistemological and methodological foundations for the study of economic and commercial diplomacy as an interdisciplinary field that combines diplomacy, international relations and trade policy (in the broadest sense).

The main part of the training programme will start with the selection of a research topic and the elaboration of a PhD research proposal, empirically grounded and focused on the impact of China's diplomatic and economic policies on CEE countries and Slovenia. This will be followed by a comprehensive research implementation and the production of a PhD thesis based on a combination of analysis of diplomatic and diplomatic-economic priorities and strategies and case studies.

Throughout the training, research will also focus on conducting research within a research group, participating in international and national research projects, and publishing scientific papers in reputable journals in the field of diplomacy and international economic relations.

Prerequisites:

- Previous degree in a social science or a humanities discipline (International Relations, European studies, Diplomacy, Economics, Political Science).
- Active knowledge of Slovenian and English (written and spoken).

Desirable conditions:

- Previous research experience gained in the context of specific projects or international research.
- Knowledge of international economic databases (Eurostat, UNCTAD, OECD, etc.).

5. Priloge, ki jih kandidat priloži k prijavi (*Documents that the candidate submits with the application*):

- ☒ **diplomska listina/potrdilo o zaključku študijskega programa** (*diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme*)
- ☒ **priloga k diplomii/ potrdilo o opravljenih obveznostih** (*official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme*)
- ☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (*official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme*)
- ☒ **nagrade** (*awards (e.g. Prešeren Prize of the University of Ljubljana, Prešeren Prize of a University of Ljubljana member and/or another equivalent award)*)

☒ **bibliografija** (*bibliography*)

☒ **življenjepis** (*CV*)

☒ **motivacijsko pismo** (*motivation letter*)

☒ **opis dosedanjega sodelovanja pri raziskovalnem delu** (*description of the candidate's research work*)

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede, Kardeljeva pl. 5., 1000 Ljubljana
Faculty of Social Sciences, Kardeljeva pl. 5., 1000 Ljubljana

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Sara Atanasova, sara.atanasova@fdv.uni-lj.si

3. Raziskovalno področje (Research field):

5.03 Sociologija (Sociology)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Slov.: Mlada raziskovalka oz. mladi raziskovalec se bo vpisal/a v interdisciplinaren doktorski študij Humanistika in družboslovje na Fakulteti za družbene vede, Univerze v Ljubljani (FDV, UL) in zaposlil/a v Centru za metodologijo in informatiko na FDV, UL. Kandidatka oz. kandidat bo delo opravljal/a v okviru področja družboslovne informatike, pri čemer bo razvijal/a interdisciplinarno znanja v povezavi s področji družboslovne metodologije, informatike, komuniciranja zdravja in zdravstva.

Vsebinsko se bo raziskovalno delo mlade raziskovalke oz. mladega raziskovalca nanašalo na temo družbenih vidikov uporabe generativne umetne inteligence na področju zdravja in zdravstva. Orodja generativne umetne inteligence, predvsem konverzacijska umetne inteligence, postaja vse pogostejši vir z zdravjem povezanih informacij, tako za posameznike, ki jih zanima tema zdravja, kot za paciente z akutnimi ali kroničnimi zdravstvenimi težavami ter zdravstvene delavce. Ključen izziv pri uporabi konverzacijske umetne inteligence kot vira z zdravjem povezanih informacij je vprašanje zaznane kredibilnosti takšnih informacij in njihove uporabe pri odločanju o nadaljnjih z zdravjem povezanih vedenjih. Cilj raziskovanja je proučiti učinke uporabe konverzacijske umetne inteligence na zaznano kredibilnost pridobljenih informacij ter na proces odločanja v povezavi z zdravjem. Program dela bo natančneje vključeval konceptualizacijo in proučevanje večdimenzionalnosti kredibilnosti (z zdravjem povezanih) informacij generiranih s strani konverzacijske umetne inteligence, dejavnikov ocenjevanja kredibilnosti informacij generiranih s strani konverzacijske umetne inteligence (npr. zdravstvena pismenosti na področju umetne inteligence, učinek plastenja virov oz. source layering effect, funkcionalnosti orodij, konverzacijski stil in način predstavitve informacij) in merjenje zaznane kredibilnosti. Ker orodja konverzacijske umetne inteligence uporabnikom ne ponujajo le različna informacijska izhodišča za odločanje, temveč tudi predloge za nadaljnje ukrepanje in delovanje, bo posebna pozornost namenjena proučevanju procesa odločanja v zdravstvenem kontekstu, ki ima lahko pomembne posledice na zdravstvene izide. Natančnejšo temo doktorata, raziskovalni in metodološki pristop bo mlada raziskovalka oz. mladi raziskovalec znotraj raziskovalnega področja oblikoval/a in opredelil/a skupaj z mentorico, pri tem pa se bo raziskovanje osredotočalo na izbrano zdravstveno temo.

Od mlade raziskovalke oz. mladega raziskovalca se bo v okviru usposabljanja pričakovalo: redno objavljane rezultate raziskovalnega dela na nacionalnih in mednarodnih znanstvenih konferencah, redno objavljane raziskovalne rezultate v znanstvenih publikacijah in revijah, aktivno vključitev v skupnost raziskovalcev na področju proučevanja učinkov umetne inteligence na področju zdravja in zdravstva, uspešno in pravočasno opravljanje študijskih obveznosti na doktorskem študiju.

Zaželena znanja in pogoji:

Prednost bo imel/a kandidatka oz. kandidat, ki bo poleg izpolnjevanja splošnih pogojev, imel/a tudi naslednja znanja in dosegal/a naslednje pogoje:

- Visoka motiviranost za obravnavano raziskovalno tematiko,
- dobro poznavanje angleškega jezika (sposobnost pisnega in govornega izražanja na akademskem nivoju),
- znanje kvantitativnih in kvalitativnih metod raziskovanja,
- znanje kvantitativnih metod za (statistično) analizo podatkov,
- poznavanje sodobnih orodij generativne umetne inteligence,
- izkušnje z empiričnim družboslovnim raziskovanjem.

Eng.: A junior researcher will enrol in the interdisciplinary doctoral study program Humanities and Social Sciences at the Faculty of Social Sciences, University of Ljubljana (FDV, UL) and will be employed at the Centre for Methodology and Informatics at FDV, UL. The candidate will work in the field of social informatics, developing interdisciplinary knowledge related to social science methodology, informatics, and health communication.

The research work of the junior researcher will focus on the social aspects of using generative artificial intelligence in the field of health and healthcare. Generative artificial intelligence tools, particularly conversational AI, are becoming an increasingly used source of health-related information by both individuals interested in health topics and patients with acute or chronic health conditions, as well as healthcare professionals. A key challenge in using conversational AI as a source of health-related information is the issue of perceived credibility of such information and its use in health decision-making process. The aim of the research is to examine the effects of using conversational AI on the perceived credibility of obtained information and on the health decision-making process. The work plan will include the conceptualization and examination of the multidimensionality of credibility of (health-related) information generated by conversational AI, factors influencing the assessment of the credibility of such information (e.g., AI health literacy, the source layering effect, functionalities/affordances of the tools, conversational style, conversational presentation mode), and the measurement of perceived credibility. Since conversational AI tools not only provide users with different informational starting points for decision-making but also offer suggestions for further social practices and behaviour, special attention will be given to studying the decision-making process in a healthcare context, which can have significant consequences for health outcomes. The precise topic of the doctoral research, as well as the methodological approach, will be developed and defined by the junior researcher together with the mentor, focusing on a selected health-related topic.

As part of the training, the junior researcher will be expected to regularly publish research findings at national and international scientific conferences, regularly publish research results in scientific publications and journals, actively engage in the research community studying the effects of artificial intelligence in health and healthcare, and successfully and timely complete study obligations in the doctoral program.

Requirements:

Preference will be given to candidates who, in addition to meeting the general requirements, also possess the following knowledge and qualifications:

- High motivation for the research topic,
- high proficiency in English (writing and speaking at an academic level),
- knowledge of quantitative and qualitative research methods,
- knowledge of quantitative methods for (statistical) data analysis,
- familiarity with generative artificial intelligence tools,
- experience in empirical social science research.

5. Priloge, ki jih kandidat priloži k prijavi (*Documents that the candidate submits with the application*):

☒ **diplomska listina/potrdilo o zaključku študijskega programa** (*diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme*)

☒ **priloga k diplomii/ potrdilo o opravljenih obveznostih** (*official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme*)

☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (*official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme*)

☒ **nagrade** (*awards (e.g. Prešeren Prize of the University of Ljubljana, Prešeren Prize of a University of Ljubljana member and/or another equivalent award)*)

☒ **bibliografija** (*bibliography*)

☒ **življenjepis** (*CV*)

☒ **motivacijsko pismo** (*motivation letter*)

☒ **opis dosedanjega sodelovanja pri raziskovalnem delu** (*description of the candidate's research work*)

☒ **druge priloge** (*other attachments*)

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede (Faculty of Social Sciences)

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Urša Golob Podnar; ursa.golob@fdv.uni-lj.si

3. Raziskovalno področje (Research field):

Komunikologija, sociologija (Communication science, sociology)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Slov.:

Mladi_a raziskovalec_ka se bo usposabljal_a v okviru programa »Analiza dela, izobraževanja in zaposlovanja« ter tekočih raziskovalnih projektov. Raziskovanje bo usmerjeno v analizo različnih vidikov na preseku družbene odgovornosti podjetij in dezinformacij. Pri tem bo poudarek na iskanju novejših pristopov proučevanja in razumevanja problematike (npr. pristopu oz. teoriji organiziranja [Czarniawska]), ki vključujejo omrežja različnih akterjev (npr. medijev, regulatornih organov, preverjevalcev trditev, zaposlenih, potrošnikov ...). Specifika raziskovalnega usposabljanja mladega_e raziskovalca_ke bo v tem, da bo potekalo na presečiščih komunikologije, organizacijskih študij in poslovnega okolja podjetij (tj. "business and society") in temeljilo na prepletu raznolikih konceptualnih pristopov, epistemoloških pogledov in raziskovalnih registrov, katerih skupni imenovalec bo pridobivanje in razvijanje znanj za razumevanje in analizo sodobnih izzivov, s katerimi se srečujejo organizacije v digitalni dobi.

Na študijskem področju se bo mladi_a raziskovalec_ka izobraževal_a v okviru doktorskega študija Humanistika in družboslovje na Fakulteti za družbene vede, tema doktorata pa bo izbrana in konkretizirana v okviru zgoraj opisanih usmeritev raziskovanja.

V okviru raziskovalnega dela in v času priprave doktorske disertacije bo usposabljanje potekalo tudi z udeležbo na nacionalnih in mednarodnih strokovnih dogodkih in konferencah, izmenjavah v tujini, ipd.

Prednost bodo zato imeli kandidati_ke, ki izpolnjujejo naslednje pogoje:

- aktivno znanje vsaj angleškega jezika;
- sposobnost analitičnega razmišljanja,
- visoka sposobnost teoretskega in konceptualnega pisnega in ustnega izražanja.

Kandidat_ka bo poleg dela na doktorski disertaciji sodeloval_a tudi pri raziskovalnem delu na tekočih raziskovalnih projektih in pri pripravi skupnih raziskovalnih dogodkov. Zato je pogoj predhodna izobrazba s področja komunikologije, medijev, tržnega komuniciranja ali odnosov z javnostmi in znanje oz. poznavanje raziskovalnega, projektnega in analitičnega dela.

Zažele so tudi:

- veščine javnega nastopanja,
- izkušnje s strokovnim ali znanstvenim pisanjem.

Od kandidata_ke se pričakuje tudi zmožnost sodelovanja pri timskem delu, velika mera samoiniciativnosti in samostojnosti ter delovna etika.

Eng.:

The young researcher will receive training within the framework of the program "Analysis of Work, Education, and Employment" and ongoing research projects. The research will focus on analyzing various aspects at the intersection of corporate social responsibility and disinformation. Emphasis will be placed on exploring new approaches to studying and understanding this issue (e.g., the theory of organizing [Czarniawska]), which include networks of different actors (e.g., media, regulatory bodies, fact-checkers, employees, consumers, etc.).

The specificity of the research training for the young researcher will lie in its interdisciplinary nature, occurring at the crossroads of communication studies, organizational studies, and business and society field. The training will be based on an integration of diverse conceptual approaches, epistemological perspectives, and research frameworks, with the common goal of developing knowledge and analytical skills to understand the contemporary challenges organizations face in the digital age.

In the academic field, the young researcher will be enrolled in the doctoral program in Humanities and Social Sciences at the Faculty of Social Sciences. The doctoral dissertation topic will be selected and concretized within the above-described research orientations.

During the research work and the preparation of the dissertation, training will also include participation in national and international professional events and conferences, exchange programs abroad, and similar activities.

Candidate Requirements

Preference will be given to candidates who meet the following criteria:

- Active knowledge of English (at least),
- Analytical thinking skills,
- Strong theoretical and conceptual writing and oral communication skills.

In addition to working on their doctoral dissertation, the candidate will also contribute to ongoing research projects and the organization of joint research events. Therefore, a background in communication studies, media studies, or related fields (such as marketing communication, public relations) is required, along with knowledge of research, project management, and analytical work.

Preferred qualifications:

- Public speaking skills,
- Experience in professional or scientific writing.

The candidate is also expected to have the ability to collaborate in team settings, demonstrate a high degree of self-initiative and independence, and uphold strong work ethics.

5. Priloge, ki jih kandidat priloži k prijavi (*Documents that the candidate submits with the application*):

☒ **diplomska listina/potrdilo o zaključku študijskega programa** (*diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme*)

☒ **priloga k diplomam/ potrdilo o opravljenih obveznostih** (*official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme*)

☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (*official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme*)

☒ **življenjepis (CV)**

☒ **motivacijsko pismo** (*motivation letter*)

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede (Faculty of Social Sciences)

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Valentina Hlebec, valentina.hlebec@fdv.uni-lj.si

3. Raziskovalno področje (Research field):

Družboslovna metodologija (Social science methodology)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Mladi raziskovalec bo zaposlen Centru za raziskovanje javnega mnenja in množičnih komunikacij na Fakulteti za družbene vede in se vpisal na interdisciplinarni doktorski študij družboslovne metodologije na Fakulteti za družbene vede. Njegovo delo bo umeščeno v metodološko polje s primarno vsebinsko usmeritvijo v mednarodno anketno raziskovanje ter primerjavo sodobnih načinov zbiranja anketnih podatkov ter procesov anketnega raziskovanja.

V prvem obdobju bo študent poglobil metodološko znanje s področja anketne metodologije. Osrednji del programa usposabljanja se bo začel s samostojno izbiro raziskovalne teme in natančnejšim oblikovanjem samostojne raziskave z uporabo sekundarnih in primarnih podatkov iz mednarodnih raziskav, ki potekajo v CMMJK. Usposabljanje bo skozi celotno trajanje vključevalo tudi izvajanje raziskovalnega dela v okviru programske skupine in njenega mednarodnega sodelovanja.

Pogoj je predhodna družboslovna ali statistična izobrazba, ki je vključevala tako kvalitativne kot kvantitativne metodološke predmete. Pogoj je aktivno znanje vsaj angleškega jezika, zelo zaželeno pa je aktivno znanje še kakega drugega velikega tujega jezika. Zaželeno so predhodne metodološke izkušnje, pridobljene v okviru konkretnih raziskav, po možnosti v mednarodnem okolju, in študijske ter raziskovalne izkušnje z metodološkega področja. Zelo zaželeno so izkušnje uporabe metodoloških programskih orodij (npr. SPSS, R, Stata, NVivo, MAXQDA ipd.)

Zaželeno je, da prijava vsebuje:

- Spremni dopis s kratkim motivacijskim pismom (motiv za delo na metodološkem centru in za pridobitev na področju družboslovne metodologije).
- Strokovni življenjepis.
- Potrdilo o pridobljeni izobrazbi s pregledom opravljenih izpitov.
- Opis raziskovalnih izkušenj.
- Zelo kratko predstavitev (1–3 strani) raziskovalne ideje, če je možno, že v obliki osnovnega predloga doktorske raziskave (s kratkim opisom temeljnih ciljev, raziskovalnih vprašanj, lahko tudi hipotez, predvidenih metod dela ...)

Eng.: The junior researcher will work at the Centre for Public Opinion and Mass Communication Research at the Faculty of Social Sciences and will enroll in the interdisciplinary PhD program in Social Science Methodology at the Faculty of Social Sciences. The thesis will be embedded in a methodological field with a primary focus on cross-national survey research and comparisons of traditional vs modern survey data collection modes. The training and work will primarily involve the development of methodological skills - both quantitative and qualitative - and, in terms of content, within cross-national survey methodology. The first, academic part of the research assignments will focus on intensive acquisition, deepening and development of key social methodological tools, as well as the epistemological and methodological foundations of social science methodology, specifically survey methodology. The central part of the training program will start with the independent selection of a research topic and the refinement of a doctoral research in the field of survey methodology. This will be followed by individual research and secondary as well as primary cross-national data. Throughout the training, the candidate will also be involved in conducting research within the research group and its international collaborations. The prerequisite is

a previous education in the social sciences or statistics, Active knowledge of at least English is a prerequisite, and active knowledge of another major foreign language is highly desirable.

Previous methodological experience gained in the context of concrete research, preferably in an international setting, and study and research experience in the field of methodology are desirable. Experience in the use of methodological software tools (e.g. SPSS, R, Stata, NVivo, MAXQDA, etc.) is highly desirable. It is envisaged that the application includes: - A brief motivation letter (motivation to work at the Methodology Centre and to obtain a PhD in Religious Studies). - Professional CV. - Certificate of educational qualifications with a review of the examinations passed. - Description of research experience. - A very brief presentation (1-3 pages) of the research idea, if possible already in the form of a basic proposal for doctoral research (with a brief description of the basic aims, research questions, hypotheses, methods of work envisaged, etc.)

5. Priloge, ki jih kandidat priloži k prijavi (*Documents that the candidate submits with the application*):

- ☒ **diplomska listina/potrdilo o zaključku študijskega programa** (*diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme*)
- ☒ **priloga k diplomii/ potrdilo o opravljenih obveznostih** (*official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme*)
- ☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (*official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme*)
- ☒ **nagrade** (*awards (e.g. Prešeren Prize of the University of Ljubljana, Prešeren Prize of a University of Ljubljana member and/or another equivalent award)*)
- ☒ **bibliografija** (*bibliography*)
- ☒ **življenjepis** (*CV*)
- ☒ **motivacijsko pismo** (*motivation letter*)
- ☒ **opis dosedanjega sodelovanja pri raziskovalnem delu** (*description of the candidate's research work*)
- ☒ **osnutek idejne zasnove raziskovalnega dela** (*preliminary research proposal*)
- ☒ **priporočilno pismo** (*letter of recommendation*)

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede (Faculty of Social Sciences)

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Jernej Kaluža, jernej.kaluza@fdv.uni-lj.si

3. Raziskovalno področje (Research field):

5.06.03 Komunikologija (Communication science)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Slov.: Mladi raziskovalec_ka se bo vpisal_a na interdisciplinarni doktorski študij na Fakulteti za družbene vede in se zaposlil_a v Centru za raziskovanje družbenega komuniciranja na Fakulteti za družbene vede. Svoje raziskovalno delo bo opravljal_a na področju komunikologije.

Program dela mlade raziskovalke_ca se bo povezoval z vsebinami, ki jih Center za raziskovanje družbenega komuniciranja proučuje v aktualnih projektih in nacionalnem raziskovalnem programu »Množični mediji, javna sfera in družbene spremembe«. Te teme so denimo vprašanje posledic algoritmizacije in platformizacije na javno komuniciranje, medijski sistemi, teorije javnosti in javne sfere, filozofija komuniciranja, itd. Raziskoval_a bo tudi kritične – filozofske in sociološke - teorije javnega komuniciranja od 18 stoletja do sodobnosti.

Primerne teme doktorskega projekta vključujejo tako teoretske kot empirične pristope k raziskovanju (ali kombinacijo obojih).

Empirično raziskovanje se lahko na primer osredotoča na vplive algoritmizacije in digitalizacije na delovanje medijskega trga in medijsko zakonodajo, spreminjajoče se poslovne modele novinarskih medijev in posledice teh sprememb na položaj novinarjev in drugih skupin novinarskih delavcev, kot tudi na nove akterje v javni sferi kot so digitalne platforme, ponudniki digitalnih tehnoloških rešitev ali inovativni medijski projekti.

Druga možnost je bolj teoretska smer raziskovanja, ki se osredotoča na kritične teorije komuniciranja, javne sfere, medijev itd.

Doktorski_a študent_ka bo v okviru doktorskega študija pridobival_a oziroma razvijal_a interdisciplinarno znanje, ki poleg komunikologije zajema tudi spoznavanje s kvalitativnimi in kvantitativnimi metodami družboslovnega raziskovanja. Poleg teoretskih znanj s področij filozofije, sociologije in medijskih študij bo doktorski_a študent_ka pridobil_a tudi poznavanje kvantitativnih in kvalitativnih zbiranja in analize podatkov, vključno z metodami temelječimi na umetni inteligenci in analizi velikega podatkovja.

Mladi raziskovalec_ka se bo v okviru usposabljanja imel_a možnost aktivno vključiti v mednarodno raziskovalno skupnost na področju proučevanja komuniciranja, medijev in

novinarstva, sodelovati na znanstvenih konferencah ter objavljati zaključke svojega raziskovalnega dela v znanstvenih publikacijah s področja komunikologije in ostalih povezanih družbenih ved.

Prednost bo imel_a kandidat_ka, ki bo poleg izpolnjevanja splošnih pogojev dosegal_-a tudi naslednje zaželeno pogoje oziroma bo imel/-a naslednja znanja:

- Poznavanje kritičnih pristopov k družboslovnemu raziskovanju;
- Poznavanje zgodovine kritične teorije, sociologije, filozofije in komunikologije;
- Izkušnje s sodelovanjem pri raziskovalnem delu;
- Poznavanje kvalitativnih in kvantitativnih metod za zbiranje in obdelavo podatkov;
- Poznavanje delovanja medijev in izkušnje z novinarskim delom in/ali delom v medijih;
- Poznavanje medijskih sistemov in medijske zakonodaje.

Eng.: The young researcher will enroll in an interdisciplinary doctoral study program at the Faculty of Social Sciences and will be employed at the Social Communication Research Center at the Faculty of Social Sciences. Their research work will be conducted in the field of communication studies. The work program of the young researcher will be connected with the topics studied by the Social Communication Research Center on in its ongoing projects and the national research program "Mass Media, Public Sphere, and Social Change." These topics include, for example, the consequences of algorithmization and platformization on public communication, media systems, theories of the public and the public sphere, the philosophy of communication, and more.

The researcher will also explore critical—both philosophical and sociological—theories of public communication from the 18th century to the present. Suitable doctoral project topics include both theoretical and empirical research approaches (or a combination of both). Empirical research could, for instance, focus on the impact of algorithmization and digitalization on the functioning of the media market and media legislation, the evolving business models of news media and the consequences of these changes on the position of journalists and other news workers, as well as new actors in the public sphere, such as digital platforms, providers of digital technological solutions, or innovative media projects. Another possibility is a more theoretical research direction, focusing on critical theories of communication, the public sphere, and media.

As part of the doctoral study program, the doctoral student will acquire and develop interdisciplinary knowledge that, in addition to communication studies, includes familiarity with qualitative and quantitative methods of social science research. Besides theoretical knowledge in the fields of philosophy, sociology, and media studies, the doctoral student will also gain expertise in quantitative and qualitative data collection and analysis, including methods based on artificial intelligence and big data analysis.

During their training, the young researcher will have the opportunity to actively engage in the international research community in the fields of communication, media, and journalism studies, participate in scientific conferences, and publish the findings of their research in academic publications in the field of communication studies and other related social sciences.

Preference will be given to candidates who, in addition to meeting the general requirements, also fulfill the following desirable criteria or possess the following knowledge:

- Familiarity with critical approaches to social science research;

- Knowledge of the history of critical theory, sociology, philosophy, and communication studies;
- Experience in participating in research work/research projects;
- Knowledge of qualitative and quantitative methods for data collection and analysis;
- Understanding of media functioning and experience in journalism and/or media-related work;
- Knowledge of media systems and media legislation.

5. Priloge, ki jih kandidat priloži k prijavi (*Documents that the candidate submits with the application*):

- ☒ **diplomska listina/potrdilo o zaključku študijskega programa** (*diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme*)
- ☒ **priloga k diplomi/ potrdilo o opravljenih obveznostih** (*official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme*)
- ☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (*official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme*)
- ☒ **nagrade** (*awards (e.g. Prešeren Prize of the University of Ljubljana, Prešeren Prize of a University of Ljubljana member and/or another equivalent award)*)
- ☒ **bibliografija** (*bibliography*)
- ☒ **življenjepis** (*CV*)
- ☒ **opis dosedanjega sodelovanja pri raziskovalnem delu** (*description of the candidate's research work*)
- ☒ **druge priloge** (*other attachments*)

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede (Faculty of Social Sciences)

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Marjan Smrke; Marjan.Smrke@fdv.uni-lj.si

3. Raziskovalno področje (Research field):

6.06 Kulturologija (Culturology)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Slov.: Mladi raziskovalec/ka se zaposli v Centru za proučevanje kulture in religije na Fakulteti za družbene vede. Vpiše se na doktorski študij na FDV. Izbere raziskovalno tematiko s področja religiozologije oz. sociologije religije. Zasnuje in dovrši doktorsko tezo z jasnim fokusom in relevanco.

Mladi raziskovalec/ka se ob tem izobražuje v smeri sodobnih razprav, kot so: vprašanje (post)sekularizacije v Evropi oz. na Zahodu; politični populizem in religija; (i)migracije in religijsko spreminjanje Evrope; religija in popularne kulture; aplikacije umetne inteligence na religijskem področju; religija in okoljevarstvena zavest.

Kandidat naj v čim večji meri izpolnjuje naslednje pogoje: 1. izkazovati mora očiten interes, strast za proučevanje religijskih pojavov. 2. Ve, kaj pomeni znanstveno obravnavati religijo. 3. Izkazuje naj osnovno poznavanje tozadevnih teorij in raziskovalnih metod, pri čemer je še posebej zaželeno poznavanje kvantitativnih metod in sposobnost analize podatkovja mednarodnih raziskav. 4. Izkazuje sposobnost pisanja znanstvenih besedil. 5. Izkazuje znanje slovenskega in funkcionalno angleškega jezika; znanje drugih tujih jezikov je zaželeno.

Eng.: The young scientist joins the Centre for Cultural and Religious Studies within the Faculty of Social Sciences. He/she is conducting research for a doctoral dissertation in the area of religious studies or sociology of religion. The thesis needs to exhibit a distinct focus, relevance, and timeliness.

During the PhD training, the young researcher explores different topics which are discussed in the present religious studies and sociology of religion: (post)secularization in Europe/West; political populism and religion; (i)migration and religious change in Europe; religion and popular culture; religion and artificial intelligence; religion and ecological consciousness.

The applicant needs to satisfy these criteria to the greatest extent possible: 1. He/she should show a clear interest and enthusiasm for exploring religious phenomena. 2. He/she understands what it entails to examine religions scientifically. 3. He/she possesses basic knowledge of fundamental scientific theories and methodologies in the areas of religious studies and sociology of religion. Regarding methods, it is very advantageous if he/she can apply advanced statistical techniques in analyzing data from international surveys. 4. He or she is capable of writing a scientific essay. 5. He/she is fluent in Slovenian and good in English; knowledge of any additional foreign language is advantageous.

5. Priloge, ki jih kandidat priloži k prijavi (Documents that the candidate submits with the application):

☒ **diplomska listina/potrdilo o zaključku študijskega programa** (diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme)

☒ **priloga k diplomii/ potrdilo o opravljenih obveznostih** (official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme)

☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme)

☒ **življenjepis (CV)**

☒ **motivacijsko pismo** (motivation letter)

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede (Faculty of Social Sciences)

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Samo Uhan (samo.uhan@fdv.uni-lj.si)

3. Raziskovalno področje (Research field):

Sociologija/metodologija družboslovnega raziskovanja (Sociology / Social science methodology)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Slov.: Mladi raziskovalec oz. mlada raziskovalka se bo zaposlil_a v Centru za raziskovanje javnega mnenja in množičnih komunikacij na Fakulteti za družbene vede in se predvidoma vpisal_a na interdisciplinarni doktorski študij na FDV. Njegovo/njeno delo bo umeščeno na področje razvoja metodoloških rešitev v povezavi s tematskimi sklopi mednarodnih raziskav, ki jih izvaja CJMMK, kot tudi na osrednjem longitudinalnem projektu Slovensko javno mnenje. Od kandidata oziroma kandidatke se pričakuje poznavanje socioloških konceptov v povezavi z raziskovanjem javnega mnenja ter poznavanje procesov empiričnega zbiranja podatkov.

Usposabljanje in delo bo zajemalo predvsem razvoj temeljnih metodoloških – tako kvantitativnih kot kvalitativnih znanj, v vsebinskem smislu pa tudi razvoj konceptov uporabnih v mednarodnem primerjalnem raziskovanju v okviru raziskav kot so npr. EVS, ISSP, ESS ipd. Prvi, študijski del raziskovalnih nalog bo usmerjen v intenzivno pridobivanje, poglobljanje in razvijanje ključnih družboslovnih metodoloških orodij, ob tem pa tudi epistemoloških in metodoloških osnov družboslovnega raziskovanja. Osrednji del programa usposabljanja se bo začel s samostojno izbiro raziskovalne teme in natančnejšim oblikovanjem doktorske raziskave na empirični podlagi. Sledila bo celovita izvedba raziskave in izdelava doktorske disertacije. Usposabljanje bo skozi celotno trajanje vključevalo tudi izvajanje raziskovalnega dela v okviru programske skupine in njenega mednarodnega sodelovanja.

Pogoj je predhodna družboslovna ali humanistična izobrazba, ki je vključevala tako metodološke kot tudi sociološke predmete. Pogoj je aktivno znanje angleškega jezika. Žaželene so predhodne metodološke izkušnje, pridobljene v okviru konkretnih raziskav, po možnosti v mednarodnem okolju in študijske ter raziskovalne izkušnje s področja družboslovnega raziskovanja. Želene so izkušnje uporabe metodoloških programskih orodij (npr. SPSS, NVivo, ipd.)

Eng.:

The candidate will be employed at the Center for Research on Public Opinion and Mass Communications at the Faculty of Social Sciences and will probably enroll in interdisciplinary doctoral studies at the Faculty of Social Sciences. His/her work will be placed in the field of developing methodological solutions in connection with thematic sets of international

research conducted by the Center for Public Opinion Research, as well as in the central longitudinal project Slovenian Public Opinion. The candidate is expected to have knowledge of sociological concepts in connection with public opinion research and knowledge of the processes of empirical data collection.

Training and work will primarily cover the development of basic methodological - both quantitative and qualitative - knowledge, and in terms of content, also the development of concepts useful in international comparative research within the framework of research such as EVS, ISSP, ESS, etc. The first, study part of the research tasks will be focused on intensive acquisition, deepening and development of key social science methodological tools, as well as the epistemological and methodological foundations of social science research. The central part of the training program will begin with the independent selection of a research topic and the more detailed design of the doctoral research on an empirical basis. This will be followed by the comprehensive implementation of the research and the preparation of a doctoral dissertation. Throughout the entire duration, the training will also include the implementation of research work within the program group and its international cooperation.

The prerequisite is a previous social science or humanities education that included both methodological and sociological subjects. Knowledge of the English language is mandatory. Previous methodological experience gained in the context of concrete research, preferably in an international environment, as well as study and research experience in the field of social science research and experience in the use of methodological software tools (e.g. SPSS, NVivo, etc.) are desirable.

5. Priloge, ki jih kandidat priloži k prijavi (*Documents that the candidate submits with the application*):

☒ **diplomska listina/potrdilo o zaključku študijskega programa** (*diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme*)

☒ **priloga k diplomii/ potrdilo o opravljenih obveznostih** (*official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme*)

☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (*official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme*)

☒ **bibliografija** (*bibliography*)

☒ **življenjepis** (*CV*)

☒ **motivacijsko pismo** (*motivation letter*)

☒ **opis dosedanjega sodelovanja pri raziskovalnem delu** (*description of the candidate's research work*)

Opis raziskovalnega dela (Research work description)

1. Članica UL (UL member):

Fakulteta za družbene vede (Faculty of Social Sciences)

2. Ime, priimek in elektronski naslov mentorja/ice (Mentor's name, surname and email):

Matjaž Uršič (matjaz.ursic@fdv.uni-lj.si)

3. Raziskovalno področje (Research field):

Prostorska sociologija (Spatial (Urban) Sociology)

4. Opis raziskovalnega dela (Research work description):

Vključuje morebitne dodatne pogoje, ki jih mora izpolnjevati kandidat/ka za mladega raziskovalca/ko, ki niso navedeni v razpisu za mlade raziskovalce (It includes any additional conditions that the candidate for a young researcher must meet, which are not listed in the call to tender for young researchers.).

Slov.:

Mladi/a raziskovalec/ka bo delovala/a na področju prostorske in okoljske problematike ter na bolj specifičnih povezanih socioloških tematikah revitalizacije mest, trajnostnega razvoja, urbanističnega načrtovanja in lokalno/globalnega prostorskega razvoja. Mladi/a raziskovalec/ka se bo vpisal/a na interdisciplinarni doktorski program na Univerzi v Ljubljani. Zaposlil/a se bo v Centru za prostorsko sociologijo na Fakulteti za družbene vede. Od kandidata/ke se pričakuje občasno vključevanje v pedagoški proces na Katedri za sociologijo.

Tematika raziskovalnega dela mlade/ga raziskovalca/ke se bo nanašala na področje trajnostnega razvoja, družbeno-kulturne preobrazbe mest in sodobnih urbanih fenomenov v kontekstu procesov globalizacije. Še posebej se bo osredotočal/a na večplastno analizo družbenih (socialnih) in prostorskih (fizično-prostorskih) fenomenov urbanega razvoja skozi preučevanje interakcij, vplivov med različnimi deležniki, uporabniki, servisi, ki sodelujejo pri vzpostavljanju, uvajanju, integraciji novih tehnologij v mesta. Cilj preučevanja prepletanja novih tehnologij in urbanega razvoja je razviti nastavke za identifikacijo in analizo posledic, ki jih imajo ti procesi na kvaliteto življenja v mestih.

Znanstveno raziskovalno delo bo med drugim zajemalo uspešno in pravočasno opravljanje študijskih obveznosti na doktorskem študiju ter priprava dispozicije za doktorsko disertacijo; pisanje in objavljane člankov v mednarodno priznanih znanstvenih revijah; aktivno sodelovanje na sestankih projektnih skupin, v katerih sodelujejo člani_ce programske skupine.

Prednost bomo imeli kandidati, ki izpolnjujejo določene pogoje:

- Izkazana proaktivna naravnost do objavljanih znanstvenih del (v okviru usposabljanja se pričakuje redno objavljane izsledkov raziskovalnega dela na domačih in mednarodnih znanstvenih konferencah in proaktivna vključitev v omrežja raziskovalcev).
- Od mlade/ga raziskovalca/ke se pričakuje izvrstno znanje angleškega jezika;
- Izkazano poznavanje znanj s področja prostorskih (urbanih) študij ter pregledno poznavanje sorodnih področij, organizacijske sposobnosti, samoiniciativnost in odzivnost ter veselje do raziskovalnega dela.
- Bazično obvladovanje programov za kvalitativno in kvantitativno analizo podatkov (npr. SPSS, MAXQDA, NVivo) je prednost za kandidata/ko, ni pa to pogoj za uspešno prijavo.

Eng.:

The young researcher will work in the field of spatial and environmental problematic with emphasis on specific topics related to urban revitalization, sustainable development, urban planning and local/global spatial development. The young researcher will enroll in an interdisciplinary doctoral program at the University of Ljubljana. He/she will be employed at the Center for Spatial Sociology at the Faculty of Social Sciences. The candidate is expected to occasionally participate in the pedagogical process at the Department of Sociology.

The topic of the young researcher's research work will relate to the field of sustainable development, socio-cultural transformation of cities and contemporary urban phenomena in the context of globalization processes. He/she will particularly focus on the multifaceted analysis of socio-spatial phenomena of urban development through the study of interactions and influences between various stakeholders, users, and services that participate in the establishment, introduction, and integration of new technologies into cities. The aim of studying the intertwining of new technologies and urban development is to develop tools for identifying and analyzing the consequences that these processes have on the quality of life in cities.

Scientific research work will include, among other things, successful and timely completion of study obligations in doctoral studies and preparation of a dissertation proposal; writing and publishing articles in internationally recognized scientific journals; active participation in project group meetings in which members of the program group participate.

We will give preference to candidates who meet certain conditions:

- Demonstrated proactive approach to publishing scientific works (as part of the training, regular publication of research results at domestic and international scientific conferences and proactive inclusion in research networks are expected).
- The young researcher is expected to have excellent knowledge of the English language;
- Demonstrated knowledge of spatial (urban) studies and a clear understanding of related fields, organizational skills, self-initiative and responsiveness, and a passion for research work.
- Basic proficiency in programs for qualitative and quantitative data analysis (e.g. SPSS, MAXQDA, NVivo) is an advantage for the candidate, but is not a prerequisite for a successful application.

5. Priloge, ki jih kandidat priloži k prijavi (*Documents that the candidate submits with the application*):

☒ **diplomska listina/potrdilo o zaključku študijskega programa** (*diploma certificate for study programme, with which the candidate has enrolled/ will enroll in a doctoral degree programme*)

☒ **priloga k diplomi/ potrdilo o opravljenih obveznostih** (*official transcript of all the grades for study programme, with which the candidate has enrolled/will enroll in a doctoral degree programme*)

☒ **potrdilo o do sedaj opravljenih obveznostih z ocenami študijskega programa, s katerim se bo kandidat prijavil na študij** (*official transcript of all the grades the candidate has received so far for the study programme, with which the candidate will enroll to a doctoral degree programme*)

☒ **nagrade** (*awards (e.g. Prešeren Prize of the University of Ljubljana, Prešeren Prize of a University of Ljubljana member and/or another equivalent award)*)
