

Dear all,

The seventh annual Survival Analysis for Junior Researchers conference is hosted in Leiden, the Netherlands, on 24-26 April, 2018. It is a three-day event that is aimed at career-young statisticians with an interest in the application and development of time-to-event analysis and related topics. The conference provides a unique opportunity for participants to present and discuss their work with peers at a similar stage in their careers in a relaxed and friendly environment.

The event includes a **tutorial on multi-state models by Prof. dr. Hein Putter** (Leiden University Medical Center), talks from **keynote speakers Dr. Maja Pohar Perme** (University of Ljubljana) and **Dr. Birgit Witte** (VU University Medical Center, Amsterdam), as well as poster sessions, a welcome reception and a conference dinner!

Abstract submission is now open and we highly encourage potential delegates to submit an oral or poster presentation.

Please visit the conference website ([www.safjr2018.com](http://www.safjr2018.com)) for further details on the conference and for abstract submission. Some key information can be found below.
