

1. Raziskovalna organizacija (*Research organisation*):

Univerza v Ljubljani, *Fakulteta za družbene vede, Kardeljeva pl. 5, 1000 Ljubljana*

2. Ime in priimek mentorja (*Name and surname of a mentor*):

PETER STANKOVIČ

3. Področje znanosti iz šifranta ARRS (*Primary research field*):

6.06 Kulturologija

4. Kontaktni e-naslov mentorja (*Contact of a mentor*):

[peter.stankovic@fdv.uni-lj.si](mailto:peter.stankovic@fdv.uni-lj.si)

5. Kratek opis programa usposabljanja (*Short description of the program*):

SLO

Usposabljanje bo potekalo na dveh osnovnih ravneh. Prva je vezana na doktorski študij, kjer bo kandidat/ka pod mojim mentorstvom vpisal/a doktorski program in ga v roku zaključil/a. V tem okviru bo usposabljanje vključevalo mentoriran študij strokovne literature, iskanje primernih raziskovalnih metod, analizo raziskovalnega problema in interpretacijo izsledkov. Pozornost bo usmerjena tudi učenju obvladovanja daljšega teksta, kar je nujna spretnost pri pisanju doktorske disertacije.

Druga raven usposabljanja bo vezana na raziskovalno delo v programski skupini. Kandidat/ka bo tu sodelovala na vseh ravneh raziskovalnega procesa in se bo na ta način usposabljal/a za samostojno raziskovalno delo. Konkretno bo šlo za seznanjanje s postopki iskanja raziskovalnih problemov, njihovega preoblikovanja v raziskovalna vprašanja, teze ali hipoteze, konceptualizacije raziskovalnega področja, oblikovanja primerne raziskovalne metodologije, analize raziskovalnega materiala in oblikovanja analitično doslednih raziskovalnih ugotovitev.

ANG

Training will proceed on two basic levels. On the first, the candidate will enrol under my supervision a doctoral programme, which he/she will conclude by the end of the training period. In this framework, training will include supervised study of scientific literature, search for the appropriate research methods, analysis of the chosen problem, and interpretation of the findings. Much attention will be also devoted to the skill of working with a long text – for preparing a doctoral thesis, this is a very important element.

On the second level, training will be related to the ongoing research within the programme team. Candidate will be involved on all levels of research process and will be therefore prepared for individual research work. More precisely, he/she will be included in the process of identifying the research problems, their formulation in terms of scientific research questions, theses or hypotheses, conceptualisation of research field, application of the appropriate research methods, analysis of the material and formation of analytically consistent conclusions.
