

Open Research Europe

# Why Open Research Europe?

Open Research Europe is an open research publishing Platform for researchers, scientists, and clinicians funded by Horizon 2020 and/or Horizon Europe, offering rapid publication of Research Articles and non-traditional research outputs. All research outputs benefit from transparent, post-publication peer review and must adhere to our open data policy. The Platform welcomes submissions across all disciplines.

ARTICLE TYPES by subject

## Stand out through fast-track publication

Our innovative publishing model allows for rapid publication and faster discovery by allowing authors to publish research prior to obtaining peer review approval. As a result, authors could see their article **published online in a fully citable format much sooner than with traditional publishing models.**

## Publish in full compliance with Horizon Europe policies and requirements

All our publishing policies are fully aligned with those laid out in the Horizon Europe Grant Agreements so authors do not need to take any further actions – publishing in Open Research Europe guarantees full compliance.

## Boosting credibility

By sharing data openly, others can **replicate and validate results boosting the robustness of research** allowing for greater credit and recognition. Open data also enables a deeper understanding of research and can lead to increased opportunities for collaboration.

## Ensuring clarity and traceability through explicit versioning

Our versioning system allows authors to publish new versions of their article to **share the latest developments in their work.** Versions are all individually citable and linked, making it easy for readers to navigate and cite the version they want.

## Building trust through transparent peer review

Everyone can access, and learn from, reviewer feedback gathered through our fully open and invited peer review process. By publishing reviewer names and reports **we reduce the potential for bias and help reviewers get the recognition they deserve** for the work they do.

## Telling the full research story

Alongside the traditional Research Article, authors can publish **over a dozen article types** to **get recognition for all their research outputs.**
